

REMARKS

In response to the restriction requirement of March 21, 2005, the Applicant elects Species II as illustrated in claims 7-9. The Applicant believes that the new claims 8-27 are readable on the elected Species II.

The braking means recited in claim 20 is only explicitly described in the specification in connection with Species I as illustrated in Figs. 2-6, yet it is clearly stated in the description of Species II that the only difference between the first and second embodiments as described in the application is that the description for the braking means in Species I applies to Species II as well.

Examination on the merits is respectfully requested.

Respectfully submitted,

Arlene J. Powers
